TILT MASTER

Use with Open Bottom Pallets or Skids

AC • 12V DC • AIR/OIL

Models BTM-20 • BTM-40 • BTM-60

Lift and position filled tote boxes or baskets without the need of a fork truck or lift table using the newly designed heavy-duty **Tilt Master**. This unit will function as a transporter by moving completed products from work station to work station without waiting for a fork truck. A newly designed folding ergonomic handle has dual steering grips for quick and easy maneuverability. Unit has a thin profile to allow the user to get as close to the load as possible. These units are equipped with an automatic adjustable floor lock. As soon as the forks raise to 20° the adjustable floor lock engages. **Tilt Master** units tilt up to 90° and are to be used with open bottom pallets or skids.

Reduced Reach Tilt Master Straddle will minimize bending and stretching. Reduce the potential of back injuries associated with loading and unloading wire baskets, gaylord containers and corrugated palletized boxes. Reduced reach design is ideal for low height containers and small parts at the bottom of containers.
