

LOW DOCK LEVELER

Mechanical Dock
Leveler
For Low Dock Applications

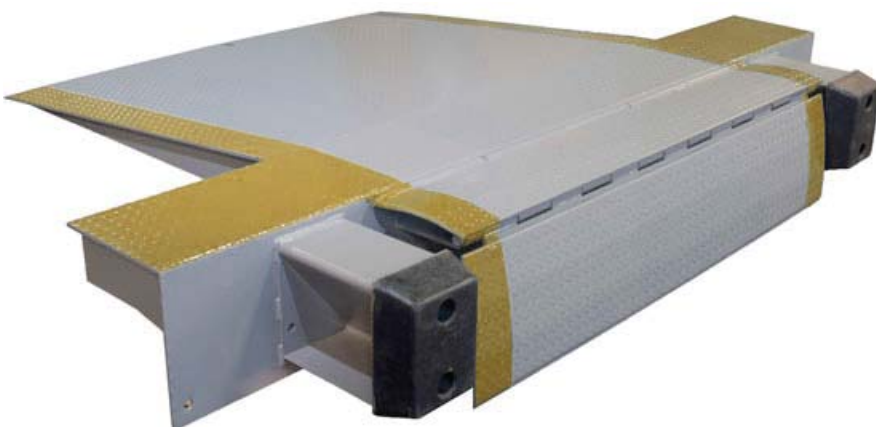

Dock Leveler with Manual Operation

Raise the height of your present dock as much as 11" without expensive dock alterations. Low dock levelers can easily be installed on any concrete dock without welding or modifications. Complete technical information and installation instructions are available upon request.

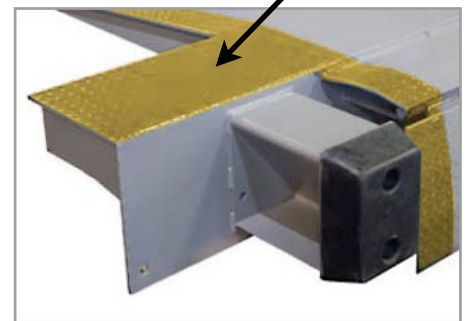

Beacon's Top of Dock leveler is designed to have a working range of 5" above and 5" below dock.

Because of gradability problems, dock levelers are not recommended for use with pallet jacks or stackers.

- Completely assembled
- No site welding required
- Available in 20,000; 25,000; and 30,000 lb. capacities.
- Hydraulic assist and refrigerated lip available as options. Hydraulic assist can be retrofitted on existing units, or is available as an add-on option.
