TDL-1100-A SERIES - MANUAL

Truck backs up to an outside flashing green traffic signal dock light. The inside traffic dock light is red. Dock attendant changes the light colors, using the toggle switch on the inside dock light, after truck has parked. The dock attendant changes the outside light to red and the inside light to green.

TDL-1100-A SERIES - AUTOMATIC

OPTION: Limit Switch installed in overhead door track. Traffic Signal Lights change when the overhead door raises or lowers. When the overhead door is closed the outside traffic dock light is green and the inside is red. When the overhead door is open the outside traffic dock light is red and the inside is green.
